☒ Feel strong

☒ Do your usual activities

☒ Sleep better

☐ Prevent chronic disease & illness

☐ Control chronic disease & illness

☐ Have less pain

☐ Control medication

☐ Less doctor appointments

☐ Less ER visits & hospital stays

TAKE CARE OF YOURSELF and your body will thank you for it.

Studies have shown that 40-80 percent of the medical information patients receive is forgotten immediately and nearly half of the information retained is incorrect.

One of the easiest ways to close the gap of communication between clinician and patient is to employ the “teach-back” method, also known as the “show-me” method or “closing the loop.”

Teach-back is a way to confirm that you have explained to the patient what they need to know in a manner that the patient understands.

“ I want to be sure that I explained what I should do.”

(e.g., This is the medication you should take for your rash.)

“ Can you tell me what you are going to do? ”

(e.g., What medication you will take?)

“ We covered a lot today about your _____, and I want to make sure that I explained things clearly. So let's review what we discussed.”

(e.g., What are three things that will help you take care of your _____?)

(e.g., What are you going to do when you get home?)

“ Do you have any questions? ”
